ALGINATE MIXER INSTRUCTIONS

HL-VMC I **HL-VMC II**

HL-VMC III **HL-VMC IV**

Hangzhou Zhonghua Medical Instrument Co., LTD.

Thanks for purchasing the VMC Alginate Mixer produced by Hangzhou Zhonghua Medical Instrument Co., Ltd. Please read the instructions carefully before using the mixer. Please keep the instructions properly for future reference. Please contact us if you have any questions.

When use the device, you must observe the rules strictly and protect correctly and safely.

The rules listed here are related to the right to control or not to control, and to the responsibility.

Please read the instructions carefully. (HL-VMC I/II/III/IV standard, which is approved by the Ministry of Health of the People's Republic of China)

Please read the standard operation procedure (SOP) (Q/ZKJ0001-2007) of Hangzhou Zhonghua Medical Instrument Co., Ltd.

1. Name of the Medical appliance

1.1. The device must be used by specific persons instead of unauthorized persons.

1.2. Medical personnel and the device

1. Medical personnel must be trained and understand well how to use a device legal.
2. It must be kept and used in the place where there is no interference from electromagnetic field, and where there is no influence on other devices.
3. It must be placed steadily and safely without any tilt, spatter or the possibility of falling.

2. Purpose

2.1 Purpose for the users: Dental Alginate and Gypsum Mixer

To guarantee the normal use of the device, the device and its accessories must be kept away from children.

2.2. You mustn't disassemble or repair the device by yourself when you find the device is broken down. Please contact with the dealer or the factory.

2.3. Our company assumes the liability of using this device, the rules must be followed strictly.

1. Maintain and change the device and its accessories according to the instructions.
2. Maintained, change and personal accident caused because of not obeying the above instructions.
3. Maintained, change and personal accident caused because of not obeying the above instructions.
4. Maintained, change and personal accident caused by using the device illegally.
5. Maintained, change and personal accident caused by unusual disasters such as earthquake, fire, flood, etc.

2.4. Our company assumes the liability of using this device, the rules must be followed strictly.

1. The attention to speed and mixing time when operation, avoiding noise and vibration caused by the device, which will influence the patient.
2. Avoiding the mixing time exceed instruction directed or changing the device must be done by professional personnel.

3. Warning

3.1 Warning: Please read the following instructions carefully before using the device.

1. Maintained damage and personal accident caused because the wall of container damaged by the rotating blade.
2. Maintained damage and personal accident caused because of not obeying the above instructions.

3.2. Warning: Please read the following instructions carefully before using the device.

1. Maintained damage and personal accident caused because of not obeying the above instructions.
2. Maintained damage and personal accident caused by using the device illegally.

4. Main Technical parameters

Code	Article	Timing Range	Weight	Dimension
HL-VMC I	Single Arm	Digital control, Timing Range 0-99s	2.5KG	240*120*240
HL-VMC II	Double Arm	Digital control, Timing Range 0-99s	3.5KG	240*120*240
HL-VMC III	X-Mixing	Digital control, Timing Range 0-99s	2.5KG	240*120*240
HL-VMC IV	Double Arm	Digital control, Timing Range 0-99s	3.5KG	240*120*240

5. Mixing Time

5.1 **Mixing Time** according to the specifications of the implement mentioned manufacturer

5.2 **Classification of the devices**: Type B of the device, constant device, use time: 10 years

5.3 **Service life**: 5 years

6. Feature of parts and their specifications

7. Usage:

7.1 Start the device

1. Put the container and disinfected mixing bowl into the tray, turn clockwise to lock it.
2. Turn the timing knob clockwise to the desired time, the LED is on and the device is ready to work.
3. Press the switch and experience a moment after the mixing bowl according to the direction of the arrow, the mixing bowl will start to rotate and the mixing arm will start to mix. Set the speed by pressing switch button to speed 1 or speed 2 and the LED light on the speed you selected. Set the mixing time by turning the timing knob and turn it according to the time direction.
4. Press the switch button to start the mixing, the LED is on. The speeds should adjust according to the viscosity of the material. The mixing time should be set according to the instructions of the material. The mixing time is 30 seconds for Alginate and 60 seconds for Gypsum.
5. Press "Stop" button,Cover ring overlap. Cut operate mixing material to remove the mixing bowl.

7.2 Start the device

1. Put the container and disinfected mixing bowl into the tray, turn clockwise to lock it.
2. Turn the timing knob clockwise to the desired time, the LED is on and the device is ready to work.
3. Put the container and disinfected mixing bowl into the tray, turn clockwise to lock it.
4. Turn the timing knob clockwise to the desired time, the LED is on and the device is ready to work.
5. Press the switch and experience a moment after the mixing bowl according to the direction of the arrow, the mixing bowl will start to rotate and the mixing arm will start to mix. Set the speed by pressing switch button to speed 1 or speed 2 and the LED light on the speed you selected. Set the mixing time by turning the timing knob and turn it according to the time direction.
6. Press the switch button to start the mixing, the LED is on. The speeds should adjust according to the viscosity of the material. The mixing time should be set according to the instructions of the material. The mixing time is 30 seconds for Alginate and 60 seconds for Gypsum.
7. Press "Stop" button,Cover ring overlap. Cut operate mixing material to remove the mixing bowl.

7.3 Start the device

1. Put the container and disinfected mixing bowl into the tray, turn clockwise to lock it.
2. Turn the timing knob clockwise to the desired time, the LED is on and the device is ready to work.
3. Press the switch and experience a moment after the mixing bowl according to the direction of the arrow, the mixing bowl will start to rotate and the mixing arm will start to mix. Set the speed by pressing switch button to speed 1 or speed 2 and the LED light on the speed you selected. Set the mixing time by turning the timing knob and turn it according to the time direction.
4. Press the switch button to start the mixing, the LED is on. The speeds should adjust according to the viscosity of the material. The mixing time should be set according to the instructions of the material. The mixing time is 30 seconds for Alginate and 60 seconds for Gypsum.
5. Press "Stop" button,Cover ring overlap. Cut operate mixing material to remove the mixing bowl.

7.4 Start the device

1. Put the container and disinfected mixing bowl into the tray, turn clockwise to lock it.
2. Turn the timing knob clockwise to the desired time, the LED is on and the device is ready to work.
3. Press the switch and experience a moment after the mixing bowl according to the direction of the arrow, the mixing bowl will start to rotate and the mixing arm will start to mix. Set the speed by pressing switch button to speed 1 or speed 2 and the LED light on the speed you selected. Set the mixing time by turning the timing knob and turn it according to the time direction.
4. Press the switch button to start the mixing, the LED is on. The speeds should adjust according to the viscosity of the material. The mixing time should be set according to the instructions of the material. The mixing time is 30 seconds for Alginate and 60 seconds for Gypsum.
5. Press "Stop" button,Cover ring overlap. Cut operate mixing material to remove the mixing bowl.

8. Caution

1. Turn the timing knob counterclockwise to the end of the timing.
2. Remove the container from the tray.
3. Remove the mixing bowl from the container.
4. Clean the mixing bowl and container.

9. Attention

1. Maintenance cannot be carried out during the device.
2. Maintenance cannot be carried out when the device is working.
3. Maintenance should be carried out by professional personnel.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

10. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

11. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

12. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

13. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

14. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

15. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

16. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

17. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

18. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

19. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

20. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

21. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

22. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

23. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

24. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

25. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

26. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

27. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

28. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

29. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

30. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

31. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

32. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

33. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

34. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

35. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

36. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

37. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

38. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

39. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

40. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

41. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

42. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

43. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

44. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

45. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

46. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.

6. Maintenance should be carried out when the device is not working.

61. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

62. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

63. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

64. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

65. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

66. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

67. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

68. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

69. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

70. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

71. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

72. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

73. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

74. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

75. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

76. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

77. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

78. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

79. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

80. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

81. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

82. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

83. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

84. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

85. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

86. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

87. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

88. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

89. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

90. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

91. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

92. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

93. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

94. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

95. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

96. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

97. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

98. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

99. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

100. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

101. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

102. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

103. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when the device is not working.
4. Maintenance should be carried out when the device is not working.
5. Maintenance should be carried out when the device is not working.
6. Maintenance should be carried out when the device is not working.

104. Attention

1. Maintenance should be carried out when the device is not working.
2. Maintenance should be carried out when the device is not working.
3. Maintenance should be carried out when
